First open platform for developers to make their own bot sandbox. First launch cross exchange platform that open and made available to data scientist and algo developers. Profitlock is the next step forward in unity exchange trading space.

Our solution

While our competitors were focused on unifying exchange platforms and business model on data harvesting and selling trading data to the existing players that ends the game. We took the next step by building cross-exchange platform in decentralized fashion. The first cross exchange framework that made available as a running node for everyone to host.

Thru access hundreds and thousands of token that they have made available in world wide exchanges. Developers will able to access data with in a tip of fingers:

1) Easy to implement trading algo
2) Develop own trading strategies and compares cross the networks
3) Real time data access from the top exchanges that made available on the toolbelt

4) Hosting competitions to reward the best algo developers
5) Bringing hundreds of ico from across to the world for reducing fractions raising fund in exchange marketing
6) Bringing markt sentimentals ai development for running multiple exchange campaign.
7) Develop better exchange market transparencies

Token presale round/ soft cap round.
Total supply : 650,000,000.0000 PROK, estimate roi x1000
WAVES issued token PROK
1 PROK = 0.00265 ETH（around= $2.000）
Soft Cap 6,625 ETH
Hard Cap 13,262 ETH

You too can start using PROK and join our ecosystem. As the amount of bots deployments grows exponentially, Profitlock will be used by more and more deployments on VPS node for specific trading algo bot via smart contracts. Thus the Demand for out tokens should also rise.

Demand for the PROK token will come from:
1) Business implementing listing of new exchange
2) Business using our Framework in terms of Data
3) Nodes staking PROK to deploy VPS trading node
4) Bounty program that staking PROK to reward the best algo across all networks
5) Strategic partners that enters to our funding and liquidity pool
